## **DETAILED ACTION**

Page 2

## Allowable Subject Matter

- 1. Claims 1-20 are allowed.
- 2. The following is an examiner's statement of reasons for allowance: This invention deals with a flexible electrical elongated device comprising an elongated load bearing component along the longitudinally axis and having an external surface including at least one groove disposed along the longitudinal axis, wherein said groove is configured to hold the conductor element within it and against the inside surface of the groove continuously along substantially the entire length of the device, while allowing the conductor element to move substantially radially when the device is bent (claim 1). The above stated claimed limitations, in combination with other claim limitations, is not taught or suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Response to Arguments

3. Applicant's arguments filed March 9, 2005 have been fully considered and they are persuasive. Specifically, the applicant's argument that "Wooters doesn't teach or suggest a groove configured to hold the conductor element within it and against the

Art Unit: 2831

inside surface of the groove continuously along substantially the entire length of the device but rather specifically teaches away from continuous contact with the inner surface of the grooves, where such an arrangement would retard the proper operation of their cable arrangement", is persuasive and therefore the claims have been allowed.

## Communication

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William H. Mayo III whose telephone number is (571)-272-1978. The examiner can normally be reached on M-F 8:30am-6:00 pm (alternate Fridays off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dean Reichard can be reached on (571) 272-2800 ext 31. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
